

*Dear Future Shubh Patel,*

*Your American Dream really does inspire me! It's amazing to see someone with such distinct future objectives and ambitions. Although it is commendable that you want to become affluent, keep in mind that material possessions are not everything. I urge you to put your pleasure and well-being above everything else while you pursue your objectives.*

*A good way to begin your journey toward success is by enrolling in college and pursuing your interest in computer science, which is an excellent choice. Technology is advancing day by day, and companies are hiring more people each day. You're preparing yourself for a successful career by wanting to continuously change by majoring in computer science.*

*Stay on task and never give up as you work towards your goal. You will face obstacles and failures along the way, but hard work and determination will help you get through them.*

*Finally, traveling the world and connecting with people and cultures is a fantastic dream. Traveling the world allows you to learn about diverse people's opinions and cultural ideas. Taking a break from your everyday routine to explore nature and discover what it has to offer is always a good idea.*

*Always remember to be true to yourself, prioritize your goals, and remember that there is nothing in the world I can't do if I simply try.*

*Sincerely,*

*Shubh Patel*
